

The students will be educational leaders

Educational aspect The students learn to track electricity expenses at home and at school

Environmental aspect: reducing the use of electricity will lead to a reduction in the damage to Seva as a result of the use of oil and increased air pollution

Financial aspect: reducing electricity expenses will leave a higher budget for other needs of the family

The social leadership of the students will deliver a program on three levels

Inside the school for teachers and the student council that will move the .activity inside the school

The representatives of the student council will transfer the activity they started on this topic to elementary schools in the community
