

## Preparation of EDEN Workshop - Installation of Applications

During the workshop we are dealing with the following 3 aspects of eLearning with iPads/tablets in science teaching:

1. Multimedia supported learning with the use of the apps "Coaster Physics" (available for iOS for iPhone and iPad) and "Back in Time" (available for iOS for iPad).
2. Learning with interactive simulations with the apps "The Doppler Effect" (available for iOS for iPad) and "iCircuit" (available for iOS for iPad and iPhone and for Android).
3. Learning by using tablets as mobile laboratories with the apps "SPARKvue" (available for iOS for iPad and iPhone and for Android) and "Vernier Video - Physics" (available for iOS for iPad and iPhone).

We will bring 10 iPads with these apps installed to the workshop.

If participants intend to use their own device, please be sure to have the following apps installed before the workshop:

For the iOS platform (iPad, iPhone) please open the „App Store“ on your device, search for the following apps, buy and install them:

Coaster Physics - € 0,89

Back in Time - € 6,99

The Doppler Effect - € 0,89

iCircuit - € 8,99

SparkVue - free

Vernier Video Physics - € 4,49

For the Android platform open your browser, go to the „Google Play Store“ and search for the following apps:

iCircuit - € 3,89

SparkVue - € 3,04

Thank you for preparing for the workshop!
