

**Instructions:**

- (1) Cut along the latitude lines corresponding to your location and then cut out the remainder of both shapes along their contour outline.
- (2) Fold the two lateral triangles backward by 90°.

- (3) With a thick needle, punch a hole in each dot on the numbered stripe. Check by seeing through the holes.
- (4) Glue the small lashes of the numbered stripe onto the marked positions. Ensure the stripe arches in a half circle over the sundial.
