

## How to download and install the software

Please download the software from:

<http://www.ep.ph.bham.ac.uk/twiki/bin/view/General/MinervaExercises>

From all the listed resources you will need to download:

1. MINERVA\_version\_Dec\_2012.zip
2. Zevents\_simulated.zip

When you download the MINERVA\_VERSION\_Dec\_2012 and unzip it, you will see a folder called "events".

Inside this folder make a subfolder and call it Z events. Once you download and unzip the Zevents\_simulated please transfer them in the folder you just made.

Please check that the jar file "atlantis" which is inside MINERVA works correctly (double click it).
